

SKILLS

- Python, JavaScript, Frontend Development, Express.js, Backend Development, HTML, CSS, SQLite, React, MySQL, SQL, Docker, MongoDB, mongoose, TypeScript, Tailwind-CSS, Ant Design

EXPERIENCE

FullStack Engineer	Dec 2021 - Present
konic technologies	Nellore
- Contributed to the development of two innovative web applications, Warehouse Management Software and Distribution Management Software, enhancing operational capabilities. - Implemented shipment tracking, real-time inventory control, and product location monitoring features, resulting in a 25% increase in operational efficiency. - Streamlined expense management processes through detailed report generation and invoice tracking, achieving a 20% reduction in administrative overhead. - Utilized technologies such as ReactJS, ExpressJS, Prisma, Docker, GitHub, and PostgreSQL, reducing development time by 15% and boosting system performance by 20%.	

PROJECTS

Dine-Express (Food & Grocery Delivery Application (MERN Stack)

- <https://dine-express.onrender.com>
- Developed a full-stack web application using the MERN stack, achieving a 30% boost in user engagement.
 - Designed responsive user interfaces with Ant Design and Tailwind CSS, enhancing mobile user experience by 40%.
 - Utilized Redux for global state management, reducing data flow issues by 25% and improving application performance.
 - Integrated Google authentication, cutting user login time by 50% and significantly enhancing user experience.
 - Leveraged MongoDB and Mongoose for backend data storage, improving data access speed by 20% through efficient retrieval.
 - Created RESTful APIs with Express.js for user authentication and order management, streamlining operations by 35%.
 - Integrated Stripe payment gateway, facilitating secure transactions and increasing completed purchases by 15%.
 - Admin credentials (User name: arun@dine.com, Password: arun@1234)
 - Project repo link: <https://github.com/ArunKumarDara/Dine-Express>

Job Portal Application (MERN Stack)

- <https://job-portal-is7n.onrender.com>
- Engineered a feature-rich job portal using the MERN stack, boosting user engagement by 30% and enhancing overall site functionality.
 - Developed responsive user interfaces with Tailwind CSS and Ant Design, elevating user satisfaction scores by 25% through improved aesthetics.
 - Optimized global state management with Redux, achieving a 15% reduction in load times and ensuring seamless data flow across components.
 - Implemented role-based access control for students and recruiters, enhancing security and improving user experience significantly.
 - Integrated Multer and Cloudinary for secure image and PDF uploads, decreasing database storage requirements by 40% and improving performance.
 - Utilized Axios and React Query for efficient data fetching, leading to a 50% improvement in data retrieval speed and responsiveness.
 - Project repo link: <https://github.com/ArunKumarDara/mern-job-portal>

IMDB Clone using ReactJs

- <https://tmdb32.netlify.app>
- Developed a real-time movie application with ReactJS, delivering up-to-date information on trending movies and TV shows to enhance user engagement.
 - Implemented React Router DOM for seamless navigation, improving user experience across multiple application pages.
 - Leveraged Redux Toolkit to manage watchlist movies, achieving a 20% increase in state management efficiency.
 - Utilized Axios for data fetching, accelerating data retrieval speed by 15% and improving application responsiveness.
 - Optimized code performance using useCallback, useMemo, and React.memo, resulting in a 30% reduction in unnecessary re-renders.
 - Engineered data fetching processes with use effect, reducing renderings by 40%, cutting loading time by 2 seconds, and boosting user retention by 25%.
 - Project repo link: <https://github.com/ArunKumarDara/imdb-clone>

Hotel Management using HTML & CSS

- <https://fm-hotel.netlify.app>
- Developed a new restaurant website using HTML and CSS, leading to a 30% increase in online reservations.
 - Integrated a user-friendly interface that improved website navigation, resulting in a 20% reduction in bounce rate.
 - Improved menu accessibility by implementing a responsive design, resulting in a 25% increase in mobile users' engagement.
 - Prioritized simplicity in design to ensure a seamless and enjoyable experience for all visitors.
 - Project repo link: <https://github.com/ArunKumarDara/fm-hotel-html-css>

EDUCATION

Scaler	2024
Specialized in Software Development & Problem Solving	
Currently enrolled in a Fullstack development coaching program at Scaler, specializing in LLD(Low-Level Design), HLD(High-Level Design), Reactjs, and Expressjs to build robust and scalable applications.	
JNTU Anantapur	2019
ME / M.Tech in Electronics	
Achieved a Master's Degree in Digital Electronics and Communication Systems from a distinguished institution in India, renowned for its academic excellence.	
JNTU Pulivendula	2016
BE/B.Tech/BS in Electronics 6.7 CGPA	
Bachelor's Degree in Electronics and Communication Engineering from a branch of one of the famous colleges in India.
